Creating a Caring and Healing Environment

RBC@SSCBC Steering Committee

Authors: Heidi Basinger, BSN, RN
Project Team: The Staff at The Stefanie Spielman Comprehensive Breast Center

This mural, with our RBC vision, hangs in our employee entrance as a reminder and inspiration for all staff.

With each year, each month, and each day, there are breakthroughs and possibilities in the fight against cancer. – Stefanie Spielman

Staff can go to the patient! Lab phlebotomists from 1st floor go to the patient on the 4th floor instead of the patient coming to the lab.

The spiritual needs of our patients are an important part of a caring and healing environment. Our sanctuary was transformed to honor many spiritual traditions.

Courage awards are given to patients when treatment is completed or on their birthday if getting lifetime treatment. Ringing the Bell in Rad Onc signifies the end of treatment.

A patient preference sheet – “Getting to Know You” – asks about the patient’s preferences for music and other details. Patients are often surprised to come into the Radiation vault and hear their favorite music.
