

SITE VISIT PREPARATION™ MAGNET® VERSION

There are many demands placed on an organization as they prepare for the last phase of their journey. Organizations that complete a mock survey do much better during actual site visit than those who do not. It is very common for staff to be uncomfortable with this type of process and they often need coaching. To ensure you experience a successful ANCC site visit, we offer the Site Visit Preparation package which includes six days of consulting time provided in the following deliverables:

Mock Magnet® Survey

This two-day mock survey conducted by two consultants will closely replicate your Magnet® site visit. While the focus of the survey is on the clinical nurse, it also includes a variety of sessions with organizational key stakeholders and those responsible for performance improvement. The survey will identify areas of vulnerability and risk that could arise during the actual site visit so they can be addressed proactively.

Site Visit Preparation

Foci #1: Nurse Leaders

Nurse leaders are often unaware that they are responsible for ensuring their areas are 100% prepared to be showcased during the site visit. We support nurse leaders through a half-day interactive session that focuses on their specific role in site visit preparation.

Foci #2: Magnet® Champion Group

We support your “staff voice” team and help them explore their role in the site visit preparation. We do this through a half-day interactive session that explores options for educational materials and activities to foster organization-wide preparation.

Foci #3: Site Visit Logistics

On top of all the staff preparation there’s a great deal of effort and coordination that goes into the logistics of the site visit as well. One of our consultants will spend a day with your MPD and the others responsible for various aspects of the site visit to co-create the communication and logistical plans necessary for success.

Resource Bundle

We taken the stress out of the development of site visit education materials by developing a bundle of customizable templates for your team to use.

Let us help you be successful!
